

# California OES Weather Threat Briefing

Saturday, August 7, 2021  
9:00 AM PDT

**Day 1 (Saturday):** Low heat risk impacts expected again for the lower elevation foothills surrounding the Central Valley and across interior Southern California. Locally breezy winds for the mountains and foothills will also bring some elevated fire weather conditions this afternoon.

Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**08/07/21 - 08/13/21**

## **Saturday-Friday**

- Generally low to moderate heat risk impacts will persist across the San Joaquin Valley and interior southern California through the weekend and early next week, expanding back north as another period of hotter weather returns by the middle and end of next week. Some higher heat risk impacts are possible toward Thursday or Friday.
- Locally elevated fire weather conditions are expected each afternoon through the weekend and much of next week as winds become breezy near some of the mountains and foothills, though widespread strong winds are not expected through at least mid week
- Scattered monsoon showers and thunderstorms return to interior southern California by early to the middle of next week, with a few additional storms possible along the Sierra by late week. At this time, widespread rainfall is not expected, though typical of monsoon storms, locally heavy rainfall could develop with some storms.
